For Immediate Release

December 28, 2020

Decommissioning Update #10 for Sterigenics Former Sterigenics location: 7775 Quincy Street

This update is to inform the residents and businesses that the Village of Willowbrook has completed our assessment of the Sterigenics permit application covering both engineering and a geotechnical review of the soil remediation work at the Sterigenics building located at 7775 S. Quincy. In our previous update (#9- dated 11-23-2020) we attached their provided summary of the soil and groundwater remediation procedures.

In January 2021, the Village will be issuing a building permit to Sterigenics and the property owners for soil remediation work to begin. We anticipate the work to begin shortly after the permit is issued. In advance of the permit we have authorized the installation of a temporary construction fence & erosion control measures.

The excavation work will initially consist (refer to 11-23-2020 summary sheets) of site preparation of J.U.L.I.E. flagged locations, equipment staging, property boundary markings and the installation of chain link fencing of the area.

Once the soil testing begins, Sterigenics will be submitting the lab reports following the environmental guidelines set forth by the IEPA. The IEPA is the agency with the sole authority to issue a No Further Remediation Letter, that is required for the final decommissioning of the building.

The Village will continue to post additional updates as needed.

The building continues to be vacant.
