

A message from Mayor Trilla regarding the Coronavirus:

DuPage County moves into Phase 4 AND Vaccination Resources

On February 3, 2021, The ILDPH announced that Region 8, covering DuPage and Kane Counties can move into Phase 4 within the Restore Illinois Mitigation Plan. The Illinois Department of Public Health provides the [established guidelines](#) for this Phase.

Certain good news for our many businesses that are awaiting you with open arms, while, of course following the Phase requirements.

As of today, the State of Illinois Vaccination Plan is in Stage 1A and 1B. Continuing our determined effort to provide as much information as possible, here are some valuable resources for all residents that are interested in receiving a COVID-19 vaccine:

- The DuPage County Health Department has established a registration system that allows them to contact you with information on vaccination appointment availability and clinics. You can register on their website by clicking [here](#).
- State of Illinois Vaccination eligibility criteria
 - [Phase 1A](#)
 - [Phase 1B](#)
- [Find a vaccination site near you](#) by using the locator tool provided on the Illinois Department of Public Health website.

Your concerns on vaccine availability are understandable. We know that the 'need exceeds availability' and I know hearing the phrase 'asking for your continued patience' has been exhausted by now. We are all looking forward to hearing the 'the supply exceeds the demand'.

In closing, I encourage all residents to maintain contact with their individual health care provider and/or pharmacist(for vaccine availability) for health guidance in your particular situation.

Stay safe and healthy,

Mayor Trilla

WEAR your cloth mask- the mask must cover your nose and your mouth

WASH your hands often or use hand sanitizer

WATCH your distance – Maintain 6 feet apart

We are in this together, and Together we can keep Willowbrook safe for all.
